

COMPLETE RANGE OF
CHELATES TO PREVENT AND
CORRECT STAGES OF
DEFICIENCIES EFFICIENTLY

Tradecorp® Range

DESCRIPTION

Range of chelates in the form of EDTA and DTPA presented as soluble micro-granules (WG), indicated for preventing and correcting different micronutrient deficiencies suffered by crops

MAIN BENEFITS

- The process of chemical synthesis, along with the technology used by Tradecorp in the production plant located in Ávila (Spain), guarantees maximum protection of the micronutrient by the chelating agent
- Easier and convenient handling of the product due to the presentation in the form of soluble microgranules (WG)
- Optimum compatibility with agrochemical products and foliar fertilizers normally used
- Total and instantaneous solubility, without forming lumps or leaving sediments, keeping the tanks clean
- Maximum profitability in soil and foliar applications, regarding both preventive and remedial treatments

Tradecorp[®] Range

TECHNICAL SPECIFICATIONS

- Presentation: Soluble micro-granules (WG)
- The products are stable in a wide range of pHs

pH	2	3	4	5	6	7	8	9	
									Tradecorp Ca: 2 - 9
									Tradecorp Cu: 4 - 9
									Tradecorp Fe: 4 - 7
									Tradefer: 3 - 7.5
									Tradecorp Mn: 4 - 9
									Tradecorp Mg: 4 - 9
									Tradecorp Zn: 4 - 9
									Tradecorp Zn+Mn: 4 - 9

LIST OF PRODUCTS

Here follows the available products:

- **Tradecorp[®] Ca:** Calcium EDTA chelate containing: 14% w/w calcium oxide (CaO)
- **Tradecorp[®] Cu:** Copper EDTA chelate containing: 14.5% w/w copper (Cu)
- **Tradecorp[®] Fe:** Iron EDTA chelate containing: 13.2% w/w iron (Fe)
- **Tradefer:** Iron DTPA chelate containing: 9% w/w iron (Fe)
- **Tradecorp[®] Mn:** Manganese EDTA chelate containing: 13% w/w manganese (Mn)
- **Tradecorp[®] Mg:** Magnesium EDTA chelate containing: 10% w/w magnesium oxide (MgO)
- **Tradecorp[®] Zn:** Zinc EDTA chelate containing: 14% w/w zinc (Zn)
- **Tradecorp[®] Zn+Mn:** Zinc and manganese EDTA chelate containing: 8% w/w zinc (Zn) and 6% w/w manganese (Mn)
