

COP-IT[®]

Fungicide-Bactericide

Liquid fungicide-bactericide, used for disease control

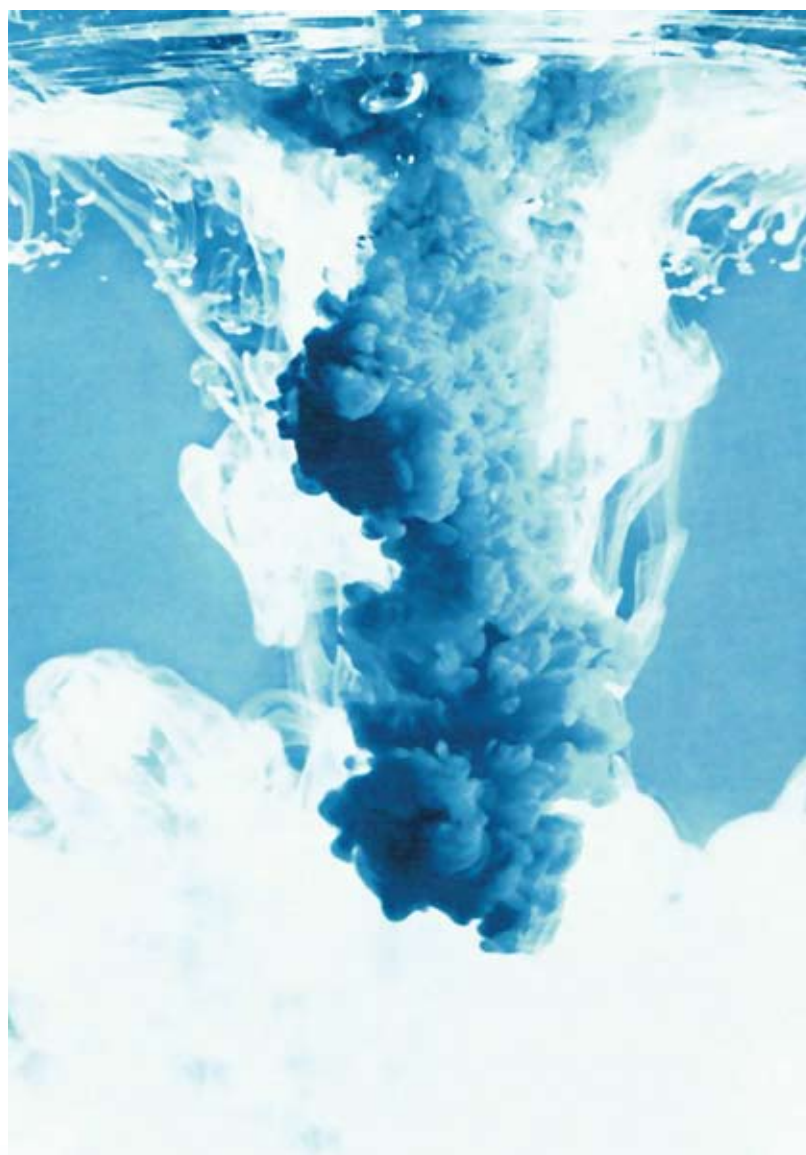

Active Ingredient: 93 g/L COPPER present as COPPER AMMONIUM ACETATE COMPLEX

Cop-IT® is a dark blue aqueous complex of copper and ammonia with various additives and is registered for disease control in a wide variety of vegetables, stone and pome fruits, nuts, tree crops, turf, ornamentals, broadacre and more. Being a true solution, it provides outstanding disease control.

Cop-IT® leaves a durable, micro-thin film, that is more persistent than wettable powders, strongly resisting wash off from rain and irrigation. This means fewer applications and longer lasting foliar protection.

Cop-IT® benefits include:

- ✓ No reported resistance to labelled diseases;
- ✓ Uses less metallic copper than other copper fungicides thus reduces potential for copper toxicity in soils;
- ✓ Contains no solids, so season to season waste is eliminated;
- ✓ Will not freeze, and if the container is kept closed, it will not evaporate;
- ✓ Is ideal for both ground and aerial application, and can be applied at any time of day;
- ✓ Is compatible with most pesticides and does not irritate spray contractors;
- ✓ **NOT a FIRE HAZARD product.**
